beamsplitters selection guide

Optics & optical coatings Guide Beamsplitters selection Guide A beamsplitter is an optic that splits light into 2 directions. The split ratio of light transmittance and reflectance is 1:1 and is called a half mirror.

OZ Optics Online. Beam Splitters

Beam Splitters Features:

- o Rugged compact design
- o Broad wavelength range
- o Low insertion loss
- o High extinction ratio
- o Low return losses
- o Low Polarization

Beam Splitters - optical power splitter, beamsplitter, thin

Beam splitters are devices for splitting a laser beam into two or more beams. There are different types, including polarizing and non-polarizing versions.
