

100Mbps fiber optic connection without router setup

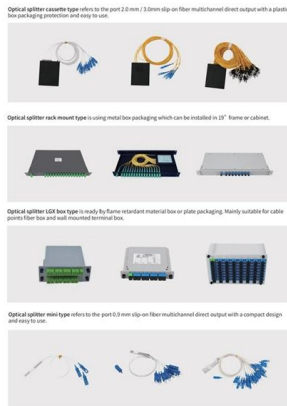

Overview

It performs all necessary signal conversions, allowing users to connect their routers and devices directly. Yes, you can install internet without a cable outlet by using alternative options such as a DSL connection that uses your phone line, fiber-optic internet that can be connected via an Ethernet cable, or wireless internet service that utilizes a modem or router without the need for a cable outlet. I tested this cable without router and get 300mbps in my desktop, but when I connect the cable in my router, the lan and wifi connections are limited to 100mbps. This guide walks you through the complete fiber installation process, from checking availability to optimizing your Wi-Fi network performance. Once you understand the basic concepts, you can check out my Recommended Equipment section toward the bottom of the.
