FRINDEL OPTICS

Is the network cable a twisted-pair cable or a fiber optic cable

Overview

Optical fiber is ideal for high-speed, long-haul networks, while twisted pair cable suits local area networks and telephone systems. A Twisted Pair Cable and a Optical Fiber Cable are two types of a network cabling. This article explores the distinctive features of these three types of cables and the differences in their. Each medium offers unique advantages in terms of speed, distance, EMI resistance, power delivery, cost, and installation.

Is the network cable a twisted-pair cable or a fiber optic cable

Computer network MCQ Quiz , Mock Test , 50 MCQs , Live score ,

Computer Network MCQ Quiz live Score - Practice 50 important networking MCQs with answers and explanations for SSC, Banking, RRB, IBPS & more.

Contact Us

Ethernet over twisted pair

Ethernet over twisted-pair technologies use twisted-pair cables for the physical layer of an Ethernet computer network. They are a subset of all Ethernet physical layers.
