

150100 Cable tray thickness

Overview

The tray has a height of 100 mm, a width of 150 mm, a length of 3000 mm, and a thickness of 1,2 mm. All illustrations, descriptions and technical information included in this document are provided as indications and can cable trays are equivalent. The mechanical and electrical characteristics, tests, certifications, overall quality management, recommendations mentioned. 3- Coupler parts are required for connections, and 4 sets of M8x15 nuts and bolts are needed. The most deployed type of Sendzimir steel is Z 275 = 275g/m² (weighed on both sides), this corresponds to 18-20 µm (micron). Sendzimir galvanized steel sourced from modern galvanizing lines has, in general, a uniform, shiny appearance.
