

2013 Cable Tray Standardization

Overview

The International Electrotechnical Commission (IEC) provides detailed guidelines for cable tray systems under IEC 61537. This standard outlines the construction requirements, testing methods, and performance parameters for cable trays and related support systems. Information on maintenance and system modification. Although NEMA administers the process and establishes rules to promote fairness in the development of consensus, it does not write the documents, nor does it independently test, evaluate, or verify the accuracy or completeness of any information or the soundness of any judgments contained in its. NEMA Standards Publication VE 2-2013 Cable Tray Installation Guidelines Endorsed by Cable Tray Institute Published by: National Electrical Manufacturers Association 1300 North 17 Street, Suite 900 Rosslyn, Virginia 22209 © 2013 National Electrical. Cable trays play a vital role in supporting electrical cables and wires in commercial, industrial, and utility installations. For proper installation, design, and maintenance, adherence to international standards is essential.
