

400G Aggregation Switch

400G Aggregation Switch

The gateway to more bandwidth with less fiber - optical

How transceiver aggregation and breakout work
First, pluggable transceivers are connected to a router or switch to send data streams over optical links. These

Optical splitter cassette type refers to the port 2.0mm / 3.0mm clip-on fiber multichannel direct output with a plastic box packaging protection and easy to use.

Optical splitter rack mount type is using metal box packaging which can be installed in 1U" frame or cabinet.

Optical splitter LST box type is ready for frame independent material box or plate packaging. Mainly suitable for cable points fiber box and with increased terminal box.

Optical splitter mini type refers to the port 0.9mm clip-on fiber multichannel direct output with a compact design and easy to use.

400Gb Data Center Switches

FS 400G data center switches offer high speeds and port densities to meet the network deployment requirements of various scenarios and the evolving requirements of next-generation data center
