

505 wavelength laser diode

Overview

This laser module is permanently fibered coupled to a single-mode fiber and provides a perfect beam with a polarization extinction ratio of more than 20 dB. QPhotonics offers a variety of single mode fiber pigtailed laser diodes in the wavelength range from 660nm to 1550nm in 14 pin DIL, Butterfly, mini DIL packages. Wavelength 505 nm, Power 5 mW, Package: Coaxial or coaxial with mounting block. The highly-functional OBIS LS/LX Systems are ideal for scientific, laboratory, and spectroscopic applications. These laser diodes also feature an integrated driver for plug and play operation, only requiring a 5V external power supply (#73-818). Its design puts an emphasis on compactness, stability and reliability so as to be optimal for the system built-in.

505 wavelength laser diode

505nm Fiber Coupled FP Laser

Housed in standard TO packages, these diodes are pigtailed to a 1-meter long single-mode fiber terminated with an FC/APC connector. Each unit undergoes rigorous testing prior to shipment to
