

5720 Aggregation Switch

Overview

Huawei S5720-EI series provide flexible all-gigabit access and enhanced 10 GE uplink port scalability. They are widely used as access/aggregation switches in enterprise campus networks or gigabit access switches in data centers. Available in 24 and 48-port gigabit and multi-gigabit models, the 5720 is based on a universal hardware solution, providing end-to-end secure network. This cost-effective access switch offers hybrid SFP+ and 10GBASE-T options, along with multigigabit support on 10GBASE-T ports, allowing scalability from 10GbE SFP+ to 100G QSFP28. As a universal hardware platform, the 5720 Series offers a user-selectable choice of Extreme's flagship switch operating systems, Switch Engine and Fabric Engine. If the datasheet does not displayed, please, download the Adobe Reader or click to view in HTML datasheet.
