

8-in-1 beam splitter

8-in-1 beam splitter

Polarizing Beamsplitters

Polarizing Beamsplitters designed to split light by polarization state rather than by wavelength or intensity are available at Edmund Optics.

[Contact Us](#)

Plate Beamsplitter

Our standard beamsplitters are designed to provide general purpose laser beamsplitting and combining for visible through near infrared applications.

Beam Splitter Selection Guide

Our beam splitters are made from high grade glass material with laser grade surface flatness & surface quality for tighter tolerance on the splitting ratio.

[Contact Us](#)

What are Beamsplitters?

Beamsplitters are optical components used to split incident light at a designated ratio into two separate beams. Additionally, beamsplitters can be used in reverse to

Beam Splitters from Thorlabs Inc

Beam Splitters from Thorlabs Inc are listed on GoPhotonics. We have compiled a list of Beam Splitters from the Thorlabs Inc website/catalog and made their products searchable by specification.

[Contact Us](#)

Beam Splitters

When working with lasers, it is often necessary to split a laser beam into two or more defined partial beams. There are a variety of beam splitters for these applications, with different advantages and

[Contact Us](#)

Beam Splitter Selection Guide

These beamsplitters are made from high grade glass materials with laser grade surface flatness and surface quality and have a tighter tolerance on the splitting ratio.

[Contact Us](#)

Beam Splitters - optical power splitter, beamsplitter, thin-film

A beam splitter (or beamsplitter, power splitter) is an optical device which can split an incident light beam (e.g. a laser beam) into two (or sometimes more) beams, which may or may not have the same
