ASEAN Multimode Fiber Optic Temperature Measurement

Optical Fiber Sensor for Curvature and Temperature Measurement

In this paper, a novel inline optical fiber sensor for curvature and temperature measurement simultaneously has been proposed and demonstrated, which can measure two

Optical Fiber Sensor for Temperature and Strain Measurement Based

A variety of specialty fibers such as no-core fiber (NCF) have already been studied to reveal their sensing abilities. In this work, we investigate a specialty fiber, square-core fiber, for

Fiber-optic multimode interference sensing: comprehensive

The measured temperature sensitivity is independent of the NA of the MMF section, while the higher NA of the MMF leads to higher absolute value of strain sensitivity.
