

Aerial Optical Cable Construction in Asia

Aerial cables are suspended from poles or pylons or mounted on buildings. Some are self-supporting, requiring no separate messenger wire between poles to support the cable's weight.

The NEC Corporation has announced the completion of the construction of the Asia Direct Cable (ADC), a high-performance submarine cable

Contact Us

Abstract An aerial cable is an insulated cable usually containing all fibres required for a telecommunication line, which is suspended between utility poles or electricity pylons. Aerial optical

Contact Us

Construction of the nearly 8,100-kilometer optical submarine cable is targeted to be completed by the third quarter of FY2022. The Asia region has
