

Applications of electrical distribution boxes in Swedish construction

Overview

On construction sites, reliable distribution boxes are essential for powering tools, machinery and temporary lighting. Under authority of Chapter 1 2 § Statute (1957:601) on electrical installations, the Swedish National Electrical Safety Board brings the following Regulations into force and determines the following general advice. § These regulations apply to the design and erection of electrical installations. The European construction standards (Eurocodes), together with the national choices in the Boverket Series of Provision on the Application of European Construction Standards (EKS) constitute the only system for structural design of building works in Sweden. 2 miniature circuit breakers (C16 A); function as automatic fuses for the Schucko socket.
