

Automatic forming and welding of cable trays

Overview

Cable Tray Welding Machines are specialized equipment designed for the automated production of cable trays, which are essential components in electrical and data cable management systems. A cable tray making machine, also known as a cable tray roll former, is an automated machine that forms metal coil strips into cable tray sections through a series of progressive dies and bending operations. It forms the sheet into specific shapes and specifications through decoiling, leveling, punching, notching, and roll forming. From shopping carts to cable trays, Clifford delivers precision-engineered machines for every mesh product.

Automatic forming and welding of cable trays

Cable Tray Making Machine

For manufacturers looking for special designs and cross-sections, customized cable tray making machines deliver unique profiles. Addition of specialized processes like center spine forming,
