

BESS Energy Storage System Remote Monitoring Solution UK

Overview

The IntelliNeo 530 BESS offers safe and reliable control for the battery energy storage system and all its key parts, and can help optimise costs, decrease noise pollution and reduce emissions. Think of them as a reliable battery bank on a larger scale - paired with solar, the grid, or a generator, they deliver clean, dependable energy in the most convenient and. But to get the most out of these systems, robust monitoring and security measures are essential. Locations are often difficult to reach and it might be too late to remedy the fault. By installing a remote monitoring system, a clear vision of consumption, electrical parameters and equipment status is always available through web-based applications, thereby quality, optimized maintenance are always. Control, protect or monitor all essential parts within the Battery Energy Storage System (BESS) with ComAp's solutions to ensure the highest level of Storage System performance and effective dispatching of the stored energy to the grid.

BESS Energy Storage System Remote Monitoring Solution UK

Smarter Energy Storage: How GPS Trackers Help Us Monitor BESS

By integrating trackers into our BESS units, we can remotely monitor state of charge (SOC), temperature, and location in real time. This level of visibility allows us and our customers to
