

Bolivian manufacturer s special optical cable G 652D

Overview

652D ADSS fiber optic cable, featuring 6 cores and a 200m span for aerial communication networks. ITU-T (International Telecommunication Union) defines several single-mode fiber standards, including G. All Dielectric Self Supporting (ADSS) Cable for a length span of up to 100 m with a capacity of 24/48 cores single mode ITU-T G. As the most widely deployed single mode fiber in the world, it is essential for high-speed data transmission over long distances. It also includes ARTIC premium designed Duct ssio and ph roug several pr cab e's per ctly buried si ho t detriment t en ro-dispersion le is totally dry type and diferent from t ed in and over the cable core to p lene is applied a. 652D Optical Fiber is ideally designed for use in metropolitan, local and access networks due to its superior specifications-low optical loss across the entire wavelength range from 1260 to 1625nm, tightest available geometry, low splice loss and low polarization mode dispersion (PMD).

Bolivian manufacturer s special optical cable G 652D

SINGLE JACKET FIBER GLASS DIELECTRIC CABLE AR-1FGTDPE

The standard structure of AR-1FGTDPE-xxF-G652D cable is shown in the following table, other structure and fibre count are also available according to customer requirements.
