

Botswana s fiber optic cable cut

Overview

Botswana Fibre Networks (BOFINET) has stated that internet connectivity in Botswana will be fully restored in May after the fixing of the WACS and EASSY undersea cables. The EASSY cable cut occurred in the Red Sea, while the West Africa Cable System (WACS) cable cut is located around. The company recently announced a P100 million (R136 million) investment to upgrade Botswana's. 6Wresearch actively monitors the Botswana Fibre Optic Cables Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook. Our insights help businesses to make data-backed strategic decisions with ongoing market dynamics. While the vandalism incidents include theft of cables, fuel, and batteries, the most alarming and costly issue has been the destruction of the fibre network. BOCRA is one of the few regulators that publish this kind of report in the region and aims to maintain the publication as an i formative report for consumers, policy makers, ICT players and other interested.
