

Bus trunking connector partition

Product Parameter	
Product Type:	Cable tray, ladder, perforated and wire mesh cable tray
Material:	Q1 steel, 304, 316, 316L, 304L, 316L, 316L, 316L, 316L
Finish:	EL, Electro galvanized, Powder coated, Electroplating, painting
Width:	50-1000mm
Height:	20mm, 30mm, 40mm, 50mm, 75mm or as you required
Thickness:	2.0-2.5mm (Aluminum sheet) or as you want cable tray
Length:	2m, 3m, 4m, 5m, 6m, 8m, 10m, 12m
Surface:	OD60, OD80 or Customized
Load Time:	10-30 days for a 20' container; 10-15 days for a 40' container
Port of Loading:	Shanghai Port, Ningbo Port, etc.

IEC Standard for Busbar Clearance The International Electrotechnical Commission (IEC) provides globally accepted guidelines for busbar clearances.

[Contact Us](#)

In order to ensure safer connection between transformer and busbar trunking unit, flexible braids are a smart solution. Energypac provides braids type flexible copper which has better vibration damping

Contact Us

The standardized tap-off units of the busbar trunking systems can be combined with standard types of device unit to form a system solution of communication-capable busbar trunking.

[Contact Us](#)

The trunking unit or end flange is simply inserted in the lower enclosure of the joint block. Then the joint block top or feeding unit is mounted, and finally a safe connection is produced by tightening four screws.

CATALOG Pmax low-voltage compact bus duct system

The Pmax series compact bus duct system is a safe, reliable, compact, efficient and customized low-voltage energy transmission solution that can fully replace traditional cable, saving time, space and
