

Can a fiber optic cable be snapped

Overview

Why not?

Fiber optic cables use infrared light, which is invisible to the naked eye. Accidental cuts, breaks, or other damage can disrupt your network and cause costly downtime. With the right tools and techniques, you can efficiently repair damaged fiber cables and restore. Here's a look at where it broke, you can see that there was a fusion done before but it actually broke a little backwards. What really caught my attention is this gray.
