

Canadian 670nm laser diode module

Overview

These fiber-coupled modules offer R&D lab researchers and system integrators a state-of-the-art high power semiconductor laser at 670 nm. 5 mm, available wavelengths 635 nm, 650 nm, 670 nm or 850 nm LDM-1x series, PCB mountable, focusable (100 μ m spotsize), divergence < 1 mrad, beam size at aperture 1 x 2. These 670nm high power laser diodes offer up to 11 watts of optical output power. The Frankfurt Laser Company (FLC) is a specialized company based in Germany that focuses on the development, production, and distribution of laser products and systems. Continuous-wave (CW) laser diodes are highly efficient and can be manufactured to emit light at various wavelengths, making them. Stand-alone or incorporated light sources are warranted for the lesser of one year or (to the extent applicable) the number of hours stated in the specifications.

Canadian 670nm laser diode module

670nm Laser Diode, 10mW Output Power from Blue Sky

670nm Laser Diode from Blue Sky Research
Product Overview Circular Laser Device from Blue Sky Research. This is a 0.67 μm band, InGaAlP index-guided,
