

Chad cable trays are available in a full range of national standard specifications

Overview

We manufacture our cable trays in compliance with British/European standard BS EN 61537 and American standard NEMA VE-1. Our products are known for their sustainable performance and all the other features that it offers. Whether specifying a major new project, refurbishing existing facilities or doing the engineering, procurement and construction (EPC) for your end user, with T&B Cabletray, ABB offers reliable solutions designed conforming to ASTM A123 & ISO 1461 : m. They tend not to be used exclusively for a particular type of wiring system, and the containment system chosen is often as much decided by the budget and practical considerations of the. Our cable trays are produced in fit for purpose materials like stainless steel, galvanized, aluminium and fibreglass (FRP/GRP) composites to suit any project type both offshore and onshore.
