

China-Europe Fiber Optic Delay Cable Laying Project

Overview

Reuters reports that China state-owned telecom firms are developing a \$500 million undersea fiber-optic internet cable network that would link Asia, the Middle East and Europe to rival a similar U. The proposed EMA (Europe-Middle East-Asia) cable would connect Hong Kong to China's island. Ander Gillenea/AFP via Getty Images Chinese researchers have unveiled a new deep-sea tool capable of cutting through the world's most secure subsea cables – and it has many in the West feeling a little.
