

Comark optical module

Overview

Description: The Ci-uf120 series is designed for use in optical Modbus fieldbus networks. Factory and MineFactory and MineFactory and MineFactory and MineFactory and MineFactory and Mine. The News COMARK Gigabit Optical Module MSFP-S-20KM is a high-performance, cost-effective, and reliable fiber optic module designed to provide exceptional data transmission over long distances. Backed by over 41 years experience and an impeccable track record, Comark delivers design excellence in off-the-shelf and custom engineered solutions for applications across the industrial and building automation space. We focus on Industrial Networking field, produce and exports Fiber Optic Repeater/Converters for Fieldbus Application include: Siemens Profibus-DP, GE Genius, A-B/Rockwell ControlNet, and Schneider Modbus Plus, Modbus, Modbus RTU, DeviceNet.

Comark optical module

Industrial Products

Comark offers a versatile range of industrial products, including displays, PCs, servers, kiosks, tablet enclosures, and embedded network appliances, designed
