

Communication equipment placed in fiber optic cable well

Overview

They provide a convenient protected enclosure for network components such as excess cable or splice cases, and provide access to the buried fiber system for critical repairs or network upgrades. (FOA) was founded in 1995 to help develop the workforce to build the fiber optic networks to support a rapid expansion in communications and the Internet. Fiber optic communications is the high-speed highway of modern data, using light to zip information through thin glass strands at blazing speeds.
