OverviewRemote KVM
extendersNameTypesUseVideo
bandwidthMonitorPassive and active (electronic)
switches

There are two types of remote KVM extenders that are best described as local remote and KVM over IP. Local remote KVM extender design allows users to control computer equipment up to 1,000 feet (300 m) away from the user consoles (keyboard, monitor and mouse). They require a direct cable connection from the computer to the KVM extender to the console and include support for standard category 5 cabling between computers and users interconnected by the extender. In contrast, USB powered KV
