

Configure to enable port 80 on Huawei fiber optic switch

Overview

To enable a port on a Huawei switch, start by accessing the device's command-line interface (CLI) via a console cable or SSH. Use the system-view command to enter configuration mode, then navigate to the target port using interface GigabitEthernet 0/0/1 (replace with your. Commands provided in this section and all the parameters in the commands are supported by all switch models by default, unless otherwise specified. For example: Replace USERNAME with the new username, set the password, define service-type (telnet, ssh, etc.
