

Connecting Huawei switch to fiber optic cable

Overview

A hybrid optical-electrical switch can be directly connected using a pigtail, connected to an HDF, or connected through a hybrid cable terminal box. An active optical cable (AOC) is a fixed-length optical fiber with optical modules at both ends. How to Configure Optical Ports on Huawei S5720-32P-EI-AC Switch?

Problem: All optical ports cannot be. Network topology refers to the way in which the links and nodes of a network are arranged in relation to each other. The Combo interface, also known as the optical-electrical multiplexing interface, consists of two Ethernet ports (one optical and one electrical) on the device panel, and there is only one forwarding interface inside the device.
