

Corneal Topography and Dry Eye Examination Instrument

Overview

It combines multiple diagnostic modalities into one device, streamlining the assessment of corneal surface conditions, contact lens fitting, and dry eye management. A valuable tool to facilitate communication with comprehensive and intuitive graphic representations. The TERA Dry Eye Imager is a multimodal platform purpose-built to detect, grade, and manage dry eye disease. Powered by robotic automation and high-resolution imaging, TERA standardizes capture, streamlines workflow, and delivers clear, actionable guidance for treatment and follow-up. Mounting directly on the slit lamp, this space-saving corneal topographer incorporates assessment of the cornea directly into the examination process. Huvitz OCTavius is an all-in-one Optical Coherence Tomography device that encompasses 3D OCT, Fundus Camera, Angiography, Biometry, and Topography.

Corneal Topography and Dry Eye Examination Instrument

Cornea 550 +

It combines multiple diagnostic modalities into one device, streamlining the assessment of corneal surface conditions, contact lens fitting, and dry eye management.
