

Cost-efficient micro-module data center IP65

Overview

Excellent environment adaptability, stable operations under -40°C-55°C; IP65 design; multiple reliability tests guarantee Modular architecture, shorten 50% go-online period; on-demand deployment, flexible investment; smart O&M, unattended operationExcellent environment adaptability, stable operations under -40°C-55°C; IP65 design; multiple reliability tests guarantee Modular architecture, shorten 50% go-online period; on-demand deployment, flexible investment; smart O&M, unattended operationOur MDCs feature 4th Gen Intel® Xeon® Scalable processors—featuring built-in accelerators to improve performance across the fastest-growing workloads in AI, data analytics, networking, storage, and HPC. By making the best use of CPU core resources, built-in accelerators can result in more efficient. The IP65+ is a revolutionary solution tailored to the evolving needs of smart cities and intelligent transportation systems. A faster, smarter, and more predictable way to deploy modular data centers anywhere. It uses racks as the datacenter carrier and fully integrates all sub-systems including UPSs, cooling, power distribution, lightning protection, fire control (optional), wiring, airflow management, intelligent. Micro module data center SDC300-M solution is a rapid, efficient, convenient, intelligent management,integrated data center solutions that be released for fast demand of cloud computing, big data, Internet of things.

Cost-efficient micro-module data center IP65

Micro and Modular Data Center Construction

Discover how a micro or modular data center can revolutionize your IT infrastructure. Contact INTUVA to schedule a consultation and take the first step toward
