

Custom-made optical modules from the source manufacturer

Overview

Explore 151 top manufacturers and suppliers of Custom Optics in our comprehensive photonics buyers' guide. A custom optic refers to an optical component that is designed, manufactured, and tailored to meet specific requirements or applications. Optopax offers comprehensive OEM manufacturing services for custom optics and imaging solutions—spanning individual lens elements, precision lens assemblies, AI-enabled camera modules, and fully integrated multimodal imaging systems. Pulsar Photonics develops and produces optical systems for laser material processing. Based on many years of experience in the field of beam shaping, optical design, measurement technology, construction and process development, machine-integrated optical modules are created that take on complex.
