

DLC Tail Fiber

DLC Tail Fiber

Optical Fiber

Fiber pigtailed are commonly used to connect optical fibers to optical modules in fiber terminal boxes (optical couplers and jumpers are also used). Figure 8-17 shows the structure of a fiber pigtail.

The tail byte must always be on a DLC boundary. · Issue #35

For CAN-FD this property must be explicitly maintained. For example (see image) for a 9-byte message the tail byte would be located in the 11th byte (i.e. DLC=12) with the 9th and 10th bytes
