

Dedicated storage devices for network racks

Overview

It makes folders (called "shares") available to all your devices so everyone accesses the same files from one central location. Hot and cold air containment systems designed to maximize cooling predictability, capacity, and efficiency at the rack, row or room level. Our NAS servers allow all authorized users to access to company data 24×7, and eRacks/NAS servers help provide tremendous competitive advantages, increase levels of customer service, and extend the collaborative reach across any project, at any company. That's why, to extract the most value from their data assets, companies today need faster, highly scalable, and secure network attached storage (NAS) solutions that can integrate easily with multicloud infrastructure to deliver cost-efficient file storage. Buying a Rackmount NAS enclosure allows you to add any combination of hard drives. With 24/7 access through your mobile device or PC, NAS is a cost-effective way to back up important data without paying a high cloud subscription fee.

Dedicated storage devices for network racks

What is NAS?

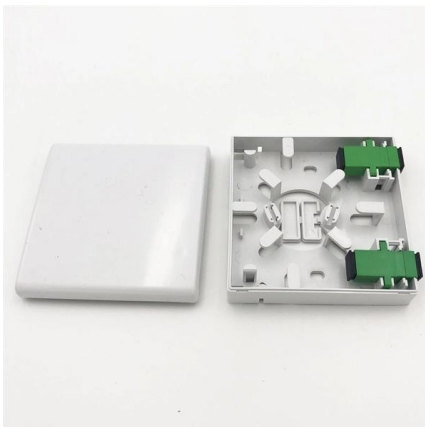

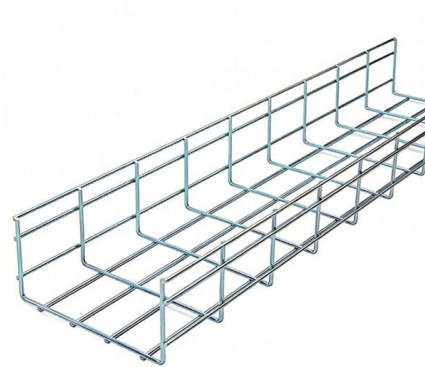

Network-attached storage (NAS) is a file-dedicated storage device that makes data continuously available for employees to collaborate effectively over a network.
