

# **Disable secondary routing on core switches**

## Disable secondary routing on core switches

---

### Re: Disable routing on the core

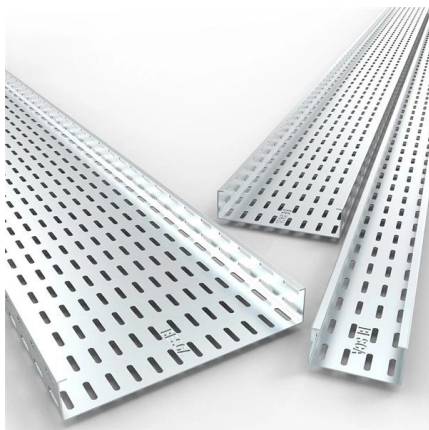

We are looking for an overall "Kill Switch" that doesn't kill the config in case of a cyber attack. We could always unplug the cores but it wouldn't help us in our recovery if we are bringing

## Question About Core Redundancy Best Practice : r/networking

The simpler your core is, the more reliable it will be. It doesn't get much simpler than pure L3 routing. If your situation is downtime sensitive, then you need something non-shared in your core.
