

Distribution Box 3050

Overview

The Metway TerminaLED S 3050 allows series-connected LEDs to be wired up quickly and easily, using standard 2-core cable. Deliveries within Germany take 2-3 days beginning after receipt of payment, for deliveries to invoice beginning with the shipment, for deliveries to cash on delivery beginning with receipt of order. You only need two things for installation - a twin cable and terminaLED® - and then you are ready to start with the quick installation of your LED spots. Ideally suited for LED lighting in kitchens, furniture, trade show booths and many other applications. Durable ABS Plastic Build: Lightweight yet sturdy construction ensures long-lasting performance while allowing seamless. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 - wherever passive distribution boxes are required. Often times a series of LED spots are created using pre-assembled cables with LED plug connectors and distributors.
