

Distribution box with top and bottom opening doors

Overview

A double door distribution board , also known as a double door consumer unit or distribution box, is an electrical enclosure used to house the electrical wiring and protective devices for a building's electrical system. Four M8x30 studsOur system consists of a stainless-steel perforated profile, welded to provide great robustness and the best quality in the market. Doors are hinged and easily removable with an opening of 120 °, the sides, rear, top and bottom can be unscrewed. The installation distribution board is available both in a surface-mounted and a flush-mounted/hollow-wall version, and thanks to the available standard colours (white RAL 9016 or grey RAL 7035) it matches any interior.
