

Distribution boxes should be painted silver-gray

Overview

Steel distribution box (switchboard) shall be painted with one coat of antirust paint first, and then two coats of gray paint. Enclosures for Electrical Equipment & Panels at Electrical Rooms, Substations and other facilities are typically "industrial grey" colored. Eaton offers hundreds of paint options that are readily available to meet normal B-Line series enclosure modification program lead times. At first I thought why not, but then I thought, why are enclosures always grey?

Is there a standard that I am missing?

I checked the.
