Dominic seismic-resistant cable trays

Westinghouse AP1000 Design Control Document Rev. 19

This appendix provides the design criteria for seismic Category I cable trays and their supports. Seismic Category II cable trays and their supports are also designed utilizing the design criteria of this appendix.

Evaluation of cable tray and conduit systems using the seismic

A method is developed for utilizing this data in defensible, simple seismic qualification criteria and configuration controls. Qualitative comparisons are used to demonstrate the applicability of the data

Appendix 3F Cable Trays and Cable Tray Supports

This appendix provides the design criteria for seismic Category I cable trays and their supports. Seismic Category II cable trays and their supports are also designed utilizing the design criteria of this appendix.

Seismic design and qualification of cable trays in nuclear power plants

Cable trays are light equipment components. They consist of steel ladder type cable trays and a support system. In case of horizontal cable trays, the trays are supported by cantilevers
