

# Features of Dominican Trough-Type Cable Trays

## Overview

---

A trough type cable tray is a continuous rigid structure used to securely support insulated electrical cables and raceways. Unlike conduit systems, cable trays allow cables to be laid in bundles, improving accessibility, heat. Whether specifying a major new project, refurbishing existing facilities or doing the engineering, procurement and construction (EPC) for your end user, with T&B Cabletray, ABB offers reliable solutions duly conforming to ASTM A123 & ISO 1461 : m. Cable Tray Supports: These include trapeze hangers, center-span supports, and wall brackets that anchor the entire system to the building structure (ceiling, wall, or floor).

## Features of Dominican Trough-Type Cable Trays

---

### Trough Cable Trays

Trough Cable Trays Specification: Custom order accepted. Trough Cable Trays offer moderate ventilation with added cable support frequency. It has the bottom
