

Fiber Optic Cable Exhibition 2019

Overview

The ECOC Exhibition is Europe's largest exhibition in the fibre optic communication technology industry and in 2019, will once again showcase the latest products and services as well as providing an unrivalled opportunity to meet and network with key suppliers and industry leaders. Simulative study shows that modular spatial channel cross-connect (SXC) architectures provide almost the same network spatial resource utilization efficiency when compared to a traditional 1 + 1 matrix-switch based SXC, while yielding considerable reduction in the total node cost in a spatial. Some format issues inherent in the e-media version may also appear in this print version.
