

Fiber Optic Line Array

Overview

Fiber arrays (or fiber-optic arrays or fiber array units) are one- or two-dimensional arrays of optical fibers. Whether integrated into planar lightwave circuits (PLCs), optical switches, or high-speed transceivers, FAs play a vital role in ensuring. For applications requiring fibers spaced apart with higher accuracy, we can also supply precision hole arrays machined in fused silica. Leveraging specialty fibers, customizable V-groove designs, and advanced dicing and metrology, Corning.

Fiber Optic Line Array

Ceramic and Fibre Optic Hydrophone as Sensors for Lightweight Arrays

The acoustic sensing capabilities of these platforms can be greatly improved by adding a hydrophone array and towing it behind them. Apart from the conventional ceramic based acoustic sensing
