

Fiber optic box for fixing optical cable and steel wire

Overview

The distribution box is used as a termination point for the feeder cable to connect with drop cable in FTTx communication network system. The fiber fixing, splitting, splicing and jumper can be done in this box, and meanwhile it provides solid protection and management for the FTTx. Fiber Distribution Box is made of high-strength steel, anti-UV, anti-aging ability. We offer various ranges of an optical joint closure from a small count to a super high count for under ground and aerial installation, and also offer an optical cabinet with compact size suitable for limited space for indoor / outdoor usage.

Fiber optic box for fixing optical cable and steel wire

Metal Joint Box for Cable Management

Metal Joint Box: IP67-IP68 rated, protects fiber/power cable splices from dust, moisture, impact. Durable steel/aluminum, easy access.
