

# Fiber optic cable gjfsh

## Overview

---

As a specialized tight-buffered indoor cable, GJFSH balances flexibility, safety (flame retardancy), and signal integrity, with its core count (ranging from 2 to 144 cores) directly matching the unique connectivity needs of different indoor spaces. GJFSH indoor fiber optic cable, a high-performance tight-buffered fiber solution tailored for indoor environments, has become the backbone of modern indoor communication networks—from commercial office buildings and data centers to hospitals and educational campuses. GJFJV GJFJH Simplex cable use single  $\phi 900\mu\text{m}$  or  $\phi 600\mu\text{m}$  tight buffer fiber as optical communication medium, the tight buffer fiber wrapped with a layer of aramid yarn as strength member units, and the cable is completed with a PVC or LSZH (Low smoke, Zero halogen, Flame-retardant) Sheath. Specification: The fibers,  $250\mu\text{m}$ , are positioned in a loose tube made of a high modulus plastic.
