Fiber optic cable principle and price

What Is Optical Fiber Technology, and How Does It Work?

What Is Optical Fiber (Fiber Optics) Technology? Fiber optics, or optical fibers, are long, thin strands of carefully drawn glass about the diameter of a human hair.

Fiber Optics: Understanding the Basics

Optical fibers are made from either glass or plastic. Most are roughly the diameter of a human hair, and they may be many miles long. Light is transmitted along the

Fiber-optic cable

Overview Design Performance Cable types Color coding Hybrid cables Innerducts See also

A fiber-optic cable, also known as an optical-fiber cable, is an assembly similar to an electrical cable but containing one or more optical fibers that are used to carry light. The optical fiber elements are typically individually coated with plastic layers and contained in a protective tube suitable for the environment where the cable is used. Different types of cable are used for fiber-optic communication in different applications, for exa
