

# Fiber optic cable terminal bundle pigtail

## Overview

---

For ease of identification, these pigtails will come in 12 different colours and are used to be optically spliced with the optical fibers from the optical cable to enable network connection. They are the bridge between fiber optic cables in the field and the equipment or patch panels that manage them. By combining factory-installed connectors with spliced bare fiber, pigtails ensure that network installers can create. This design is not only aesthetically pleasing, but more importantly, it facilitates differentiation and. Get the wrong connector type, the wrong polish, or skip proper fusion splicing technique—and you're looking at elevated signal loss, increased back reflection, and a.
