

Fiber optic cable type 88

Overview

Fibre Optic cable DIN VDE 0888, designed for the optical transmission of data and signals in tough operational conditions, such as on materials handling equipment (no reeling) or alongside conveyor belts etc. Variants of designations are used by institutions like Deutsche Telekom and German Railways. We use the limited abbreviations in the below summary which are typical ones in today's world fiber optic cable market but they are not limited with. Are you sure you want to log out of your MyMouser account?

Outstanding balance which reflects all unpaid changes due at this time per your selected payment method. Corning MIC® unitized plenum cables are designed for use in plenum, riser and general purpose environments for intrabuilding backbone installations. These multifiber cables use individually jacketed 900 µm buffered fibers enabling easy, consistent stripping and facilitating termination. Information can be viewed at This product is RoHS compliant and is directive 2002/95/EC.
