

# **Fiber optic router cannot connect automatically**

## Overview

---

Most common router problems resolve through simple troubleshooting (repositioning, rebooting, firmware updates) without technician intervention. This guide addresses frequent router issues, their causes, and practical fixes enabling reliable connectivity restoration. Fiber optic networks are celebrated for their speed and reliability, but even the best systems can encounter problems. If that does not fix the problem, then you may have to work out how to get the two routers to play nicely together. If it is anything like my ISP supplied gateway modem/router, your device will have an option to put the MR80 into its "DMZ".
