

Fill Light Module Test

Fill Light Module Test

Overview of LED standards related to lifetime and reliability testing

This specification is a general level subsystem light source specification that establishes test requirements of Light Emitting Diode (LED) components and modules for use in automotive lighting

What is Fill Light -- The Unsung Hero of 3 Point Lighting

Before we dive into types of fill lights and how to use it, we must first get a foundational understanding of its purpose. This fill light definition will help

[Contact Us](#)

Fill light

The term "spill fill" refers to fill light which results from the footprint of light sources bouncing off surfaces in the shooting environment. It can, if not observed and understood, lead to erroneous assumptions
