

Four-core vibration optical cable

Overview

We optimized and fabricated an ultra-bend-resistant 4-core simplex cable (SXC) employing 4-core multicore fiber (MCF) suitable for short-reach dense spatial division multiplexing (DSDM) optical transmission in the O-band. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles. Specifications are correct at time of printing and subject to change or alteration. Excel OM3 50/125 μm tight buffered optical fibre cables have been designed specifically for internal and external applications. 250 μm fiber is placed in a high modulus material loose sleeve, which is filled with waterproof compound.

Four-core vibration optical cable

Characterization of sensitivity of optical fiber cables to acoustic

Mechanical vibrations and acoustic noise acting on the optical fiber cause changes in the strain and the refractive index of the fiber core.
