

Gas-fired linkage module distribution box

Overview

Boxes designed to connect subscribers to the gas distribution network and to integrate cut-off, pressure reduction and metering functions. Made of composite materials: Suitable for connections equipped with: Compliance with GrDF specifications in force. Eaton's 4 to 20mA addressable modules interface with gas detection modules to enable alarms to be reported on Eaton's range of addressable fire alarm system panels. The interfaces have unique addresses on the loop and built-in isolators for loop short circuit protection. 5 kV (SF6), is a modular medium voltage switchgear for high demanding and harsh applications in primary distribution. Panasonic Modular Distribution Boxes stand out with their stylish design, reliable safety features, and compatibility with all kinds of projects.
