

Gyta256 core optical cable

Overview

Bynet GYTS, GYTA stranded loose tube cable (2-576 fibers) is an armored outdoor cable for backbone/access networks. With steel tape armor and strength members, it provides robust mechanical and moisture protection for duct, pipeline, or direct burial use. GYTA fiber optic cable is applied to long distance positioning, connection of internal building, distribution and supporting system of internal building. A steel wire sometimes sheathed with polyethylene (PE) for GYTA fiber cable is located in the center of the cores as a metal resistance element. Introduction Loose tube construction, tubes jelly filled, elements (tubes and filler rods) laid up around metallic central strength member, polyester yarns.

GYTA

ITEM: Stranded Loose Tube Light Armored Fiber Optic Cable
Fiber Cores: 2~288 Cores
Outer Jacket: PE
Standard: GYTA cable complies with Standard YD/T901-2009 as well as IEC60974-1.

Stranded Loose Tube Optical Fiber Cable GYTS, GYTA (2-576 cores)

Featuring a multi-loose-tube stranded structure, the cable offers excellent mechanical strength, enhanced water blocking, and reliable performance in harsh outdoor environments.

GYTA, GYTA fiber optic cable

The optical fibers, whether single-mode or multi-mode, are enclosed within a filling of high modulus plastic in a loose tube. The cable's core has a metal-reinforced center, with an optional extruded
