

Gyts33 optical cable

Overview

The optical fiber is inserted into a loose tube of high modulus material and filled with waterproof compound. The tube (and compound) is twisted around the strength member into a compact round cable core.

Differences between GYTS optical cable and GYTA optical cable

GYTS cable is universal optical cable; it can be used in aerial, duct and direct-buried while GYTA can be used in aerial cable and duct cable not in direct-buried cable. The S in GYTS refers to steel strip
